Considerations for Planning School-Located Vaccination Clinics

School-Located Vaccination (SLV) clinics are a type of vaccination program designed to vaccinate enrolled students on school property.SLV clinics can be particularly effective at vaccinating younger children and can be a successful way to vaccinate large numbers of children in a short period of time. In addition, SLV can be used to vaccinate at-risk children who may not be able to travel.

Considerations for Planning

Establishing Partnerships

If SLV clinics will be held, plan the basic approach:

1. Contact superintendents and principals of selected schools to solicit interest in participation.
2. Educating students, parents/guardians, and school staff about the program, involving them early in the process, and reassuring them that you will enter vaccination
3. While many healthcare providers will likely be supportive of the C-SLV programs, they may still have concerns about
4. Educational students, parents/guardians, and school staff about the program, involving them early in the process, and reassuring them that you will enter vaccination
5. In addition to routine communication about SLV clinics, planners may wish to provide speci
6. In addition, administering any medication, including vaccines, has the potential to cause adverse events. Find information on
